Guide to Completing INF 698A and 698B Masters Thesis

What is a Master's Thesis?

A master's thesis is a research project resulting in a substantive paper that involves original collection or treatment of data and/or results. It is one of three options for completing the Master of Science in Information Studies. The final product of a master's thesis is a paper of publishable quality. The master's thesis, like the doctoral dissertation, involves original research and exemplifies an original contribution to scholarship. Elements of the thesis can:

- include a pilot study upon which the dissertation will build;
- include a comprehensive review and analysis of relevant literature;
- include a research study design;
- include the collection and analysis of data, and discussion of results;
- represent a synthesis and application of the literature on a topic; and
- apply the critical evaluation of empirical studies on the topic.

The completed thesis should be formatted in accordance with the requirements of the Office of Graduate Studies. See Office of Graduate Studies for [forms and deadlines](http://www.utexas.edu/ogs/pdn/) (<http://www.utexas.edu/ogs/pdn/>) as well as their [FAQ](http://www.utexas.edu/ogs/etd/questions.html) (<http://www.utexas.edu/ogs/etd/questions.html>) on format requirements.

Registration Requirements:

1. Identify a faculty supervisor and a 2nd faculty reader.
2. Complete INF 397C, Research in Information Studies, in an earlier semester;
3. Enroll as a student pursuing a Master of Science in Information Studies.
4. Register over two consecutive long semesters in INF 698A and INF 698B (Master's Thesis).
5. Download and complete required forms from the Office of Graduate Studies.
<http://www.utexas.edu/ogs/pdn/>
6. Complete, gather signatures on, and submit iSchool Master's Thesis Proposal Form.
