INF 380E: PERSPECTIVES ON INFORMATION SYLLABUS
University of Texas at Austin
Fall 2023
Dr. R. David Lankes
DRAFT Revised August 15, 2023

Course Information
Class day and time: Mondays 9–12 pm or Mondays 3-6 pm
Class location: Morning UTC 2.112A Afternoon UTC 3.110

Instructor Information
Instructor: Dr. R. David Lankes
Email: rdlankes@utexas.edu
Telephone: 315-254-1389
Office hours will be held through Zoom at: Schedule at https://calendly.com/davidlankes/meet-with-david?month=2021-10

Teaching Assistants Information
Teaching Assistant Morning: Yujin Choi
Email: yujin.choi@utexas.edu

Teaching Assistant Afternoon: Tianhao Li
Email: tianhao@utmail.utexas.edu

Land Acknowledgement
We acknowledge that the iSchool sits on indigenous land. We would like to acknowledge that we are meeting on Indigenous land. Moreover, we would like to acknowledge and pay our respects to the Carrizo & Comerçudo, Coahuiltecan, Caddo, Tonkawa, Comanche, Lipan Apache, Alabama-Coushatta, Kickapoo, Tigua Pueblo, and all the American Indian and Indigenous Peoples and communities who have been or have become a part of these lands and territories in Texas, here on Turtle Island.

University Catalog Course Description
A multi-disciplinary and historical examination of information as a primary and foundational concept. Contrasts key literature from information studies with perspectives from other fields. Class assignments and activities are designed to introduce or reinforce the professional skills students will need to become leaders in a variety of rapidly changing information-centric careers.
Effective Fall 2014, MSIS students must earn a grade of B or better in the MSIS core courses (below) in order for the courses to apply to the master's degree. A grade of B- does NOT satisfy this requirement.

**Course Objectives and Learning Outcomes**

The course provides a foundation for understanding the theories, assumptions and perspectives on the nature of information as it appears in information studies and a variety of cognate fields. Upon successful completion of this course, students will have accomplished or be able to:

- Identify the role of information studies, broadly construed, and its role in particular environments and contexts.
- Explore how disciplines such as our own and others have looked at information as a primary and foundational concept.
- Discuss our field’s identity, whether called information studies, library and information studies, library and information science, information science, or any other number of names.
- Discuss the primary ways in which groups, organizations, and institutions employ information; delineating relationships and distinctions among forms of information work, professions, and institutions.
- Draw upon a vocabulary and expertise for thinking critically about the challenges inherent in defining, organizing and accessing information.
- Engage in the reflective, critical inquiry essential to graduate level oral and written work.

**A Note on the Syllabus**

Some see the syllabus as a sort of contract between instructor and student. It is not – that’s the catalog description. Instead, this is a resource to help you plan, succeed in class, and plan. That said, it is a vital document and one that I take seriously. I may make minor adjustments to the syllabus in the first week or two of the semester. This is mostly edits and clarifications. I will not change due dates, assignments, or grading information....unless with the unanimous consent of the class.
Class Format
This is a lecture/discussion format course. In class participation and information is essential. However, several class sessions will be help online. The days are marked in the following course schedule. These classes will be with Zoom, and the link will be available in the course Canvas site.

Assignments are turned in via Canvas.

September 25th and October 2nd will be online courses via Canvas and Zoom. More details will be provided.

Participation
Students are expected to attend each class, show up on time and ready to actively engage with the in-class discussions and activities, having thoroughly read or viewed the assigned materials, and thought not only about each reading, but how the readings relate to each other, topics we have previously discussed in class, and how they relate to current events. Students have two “free” missed classes; I understand that stuff happens and you might need to miss a class. If you need to miss more than two
classes, please talk to me about it first, since missing more than two classes might result in a grade less than a B. Avoid scheduling anything during class time (doctor appointments, interviews, etc.).

It is also important that students work hard to demonstrate respect for the opinions of others, both by listening first to understand, and by carefully and thoughtfully explaining your own ideas.

**Technology Use During Class**

Many of the class session will have in-class group activities. These will be things like developing concept maps, advertisements, and others. You are welcome to use any tools in these projects, but at a minimum you have to be familiar with Google Slides. When there is a work product to be reported back to class, you will use Google Slides for the thing that is presented (that can be cut and pasted from another tool).

Please be respectful with your use of technology during class. Having a computer is useful, and helpful in class, but please be diligent about avoiding distraction. If you need to take a phone call or send a text, please wait until break if possible.

Grading Scale

The standard grading scale will be used to evaluate student work:

- A  95-100
- A-  90-94
- B+  87-89
- B   83-86
- B-  80-82
- C+  77-79
- C   73-76
- C-  70-72
- D+  67-69
- D   63-66
- D-  60-62
- F   0-59

A grade of B (not B-) is required for this course to fulfill the core course requirement.

Assignments

All assignments are handed in via the Canvas course site.

Late assignments will lose 2 points for each day not turned in.

Critical Reflections

Students will write two critical reflections this semester. Your critical reflection should be about 500 words double spaced; about two pages but no more than three. You can choose at least one of the topics we have covered during that section and use any of the discussions or materials from the class during that topic (properly cited, of course), and reflect on how these topics relate to your previous experience or your future plans. You can definitely include additional resources if you would like, but I do not expect you to do additional research if you aren’t inclined to. The idea is for you to take some time to reflect on what we discussed and find connections with your personal life and professional plans.
The two critical reflections can build on one another. In fact, you can use these as early smaller drafts for the final essay.

**Discussion Questions and Reflections**

Students are expected to bring one thoughtful idea or question related to the reading assignments for the week. They are also asked to write a brief reflection on what they learned in class session and what questions remain. These questions are very helpful, as I can easily see trends across your entries, and clarify areas of confusion. These reflections should be two to three paragraphs.

**Essay**

The final assignment for this semester is a 5-9 page essay reviewing the material from the semester and connecting it to your own personal life or career goals. Select an issue discussed in class (including the readings), define it, give examples, give a sense of how the issue impacts society, and then what will you do about it? This last part, your impact, is crucial. This may be to learn more about it. It may be adopting an explicit set of principles. It may be simply a personal mission that will drive your work. But to be clear, this essay must explicitly state your anticipated impact in the field.

The majority of this essay will be your opinion (feel free to use first person voice, imagine you are having a conversation with me), but if you use or refer to the ideas of other authors, you must use APA formatted citations to support those ideas. You should refer to at least five publications that can include readings from class.

The essay includes four steps:

1. **Step 1 - Outline and resource list:** Make a list of the sources you might use for your essay in APA format. This can be used directly as your bibliography in your essay (copy and paste). Write a two-page outline that organizes the ideas you plan to explore in your essay. You can submit these both in one word document.

2. **Step 2 - Draft:** Write a rough draft of your essay. This should be about five pages long. I recommend you do the best you can so that your peer can give you excellent feedback and help you earn that A!

3. **Step 3 - Peer Review:** Using the Canvas tools, you will review your peer’s essay.

4. **Step 4 - Final Version:** Review the feedback from your peer and revise your essay to submit as a final version! 5-9 pages, APA format, 12-point font, double spaced. Cover page and bibliography do not count toward page numbers.

**The AI Elephant in the Room**

Feel free to use generative AI in your assignments – just let me know what you wrote, and what the machine wrote. Generative AI (as we’ll talk about in class) has exploded, and no one is sure about how it will shape fields, jobs, and disciplines. In fact, it will be you, more than most, that will determine this. It is my belief that AI will be an assistive technology to the librarian and information scientist. Might as well play with it now.
However, look again at the assignments. This is about how YOU connect ideas from the field to your future activities. ChatGPT is not going to know your experience or share your insight. When we’re grading assignments, we have only three primary criteria. Did you communicate in written form effectively? Did you demonstrate personal reflection? Did you cite external resources properly? No word counts, or memorization. You’ll do plenty of all of that in your graduate career. In this class, it is about finding your footing for that later work.

Resources

Style Manuals
Students will need to cite all sources for their essays in APA format. Purdue University Online Writing Lab (OWL) offers a great overview on how to do this [http://owl.english.purdue.edu/owl](http://owl.english.purdue.edu/owl) Style manuals are located under Research and Citation. The preference is to use APA version 7.

Plagiarism
Using someone else’s work in your own writing without giving proper credit is considered plagiarism, a serious form of academic dishonesty that can result in severe penalties. Copying someone else’s work, buying a paper and submitting it as your own, copying and pasting text (even with changes), or borrowing images from an online source, are some examples of plagiarism. Even if you plagiarize accidentally, you can be held responsible and penalized.

Learning to cite sources appropriately is an important part of becoming a professional. When you are unsure about citation, you are encouraged to ask your instructor what is appropriate in the context of your assignment. Consultants at The University Writing Center can also help you determine whether you are citing sources correctly—and they have helpful guides online for using direct quotations and paraphrasing. Reviewing those skills will help you feel confident that you are handling sources professionally in your writing.

Important University and School Information.

Title IX reminder
Beginning January 1, 2020, Texas Senate Bill 212 requires all employees of Texas universities, including faculty, report any information to the Title IX Office regarding sexual harassment, sexual assault, dating violence and stalking that is disclosed to them. Texas law requires that all employees who witness or receive any information of this type (including, but not limited to, writing assignments, class discussions, or one-on-one conversations) must be reported. If you would like to speak with someone who can provide support or remedies without making an official report to the university, please email advocate@austin.utexas.edu. For more information about reporting options and resources, visit [http://www.titleix.utexas.edu/](http://www.titleix.utexas.edu/), contact the Title IX Office via email at titleix@austin.utexas.edu, or call 512-471-0419.

Sharing of Course Materials is Prohibited:
No materials used in this class, including, but not limited to, lecture hand-outs, videos, assessments (quizzes, exams, papers, projects, homework assignments), in-class materials, review sheets, and additional problem sets, may be shared online or with anyone outside of the class unless you have my explicit, written permission. Unauthorized sharing of materials promotes cheating. It is a violation of the University’s Student Honor Code and an act of academic dishonesty. I am well aware of the sites used for sharing materials, and any materials found online that are associated with you, or any suspected unauthorized sharing of materials, will be reported to Student Conduct and Academic Integrity in the Office of the Dean of Students. These reports can result in sanctions, including failure in the course.

**Class Recordings:**
Class recordings are reserved only for students in this class for educational purposes and are protected under FERPA. The recordings should not be shared outside the class in any form. Violation of this restriction by a student could lead to Student Misconduct proceedings.

**Readings**

**Is there a textbook?**

Not really. However, the lectures and topics are explored in a book I wrote called *Forged in War: How a Century of Conflict Created Today's Information Society* published by Rowman & Littlefield. The book is **not** required, but may be of use to students who wish to review the content of lecture in written form, or explore topics raised in more depth. The book has been put on reserve in digital and physical copy with the university library.

Digital reserve is at
https://search.lib.utexas.edu/permalink/01UTAU_INST/be14ds/alma991058231942106011

**Required Readings**

This is a draft list of readings. The final reading list is found in Canvas. There is also a chance that readings will be changed during the semester to bring in current events and issues. I will provide you with links or access the full text of readings in the class.
