INTRODUCTION:

This course is a survey of graphic novels, comics, manga, and visual novels. While these media formats and types are commonly read by all ages, they are especially enjoyed by children and young adults. The time periods of Graphic Novel and Comic history will be explored, including early visual narrative development, newspaper political cartoons, superheroes, crime stories, science fiction, development of Manga and the Graphic Novel, visual novels, and the future projection of computer-based graphic and visual novels. In addition to history, students’ will also become familiar with the genres of Comics, Graphic Novels, and Manga, and the development and production of newspaper comics, comic books, Graphic Novels, visual novels, and minor aspects of computer games.

COURSE OBJECTIVES:

- Become familiar with the transition from early art and visual narrative media to modern day advances in technology and the significant manner that the reproductive nature of visual narrative art has played on culture and society.
- This course will also look into various social phenomena outside of or in parallel with the literary field to understand the underlying world of art and narrative production for comics and Graphic novels, including artistic movements, banned and censored graphic material, youth culture surrounding comics and superheroes, and the rise of Japanese/Japanese-American fan culture.
- Evaluate reading materials for children and young adults in context to the challenges and conflicts of the characters within the literature and the intended audiences of children and young adult literature within the age group of five to twenty-five.
- Evaluate and begin to understand how the characters and audience of young adult literature differ from their pre-modern counterparts, and the social and cultural crisis' and life events that mean the most to this group of young adults or teenagers.
- Distinguish between genres and recognize recurring themes within literature, especially between superheroes, science fiction, fantasy, absurd/strange, mystery, action & adventure, ‘funnies’, and drama.

CORE LITERATURE FOR COURSE:

These texts are read in their entirety during this course, and thus, must be purchased. Every other reading referenced within this course is available on the course’s Canvas page, or a separate public external site.

*Understanding Comics: The Invisible Art,* by Scott McCloud
  - Cost: $15.00 or less

*Cartooning: Philosophy and Practice,* by Ivan Brunetti
  - Cost: $13.00 or less

*DO NOT* pay more than $28.00 for these two texts (plus shipping)! These texts do not have to be new, nor do they have to be a specific edition (the ISBN is merely there to squash any confusion as to what books by these authors I am referring to). These texts are required and will be read in full over the duration of the course. *Understanding Comics* is read in completion in four weeks, so a library copy of the book may suit your needs, but we will be visiting and revisiting *Cartooning: Philosophy and Practice* throughout the course, so purchasing a copy will be more amicable. If you can finagle borrowing a library copy for fifteen weeks, be my guest.

NOTE ON HOW WORK CAN BE DONE:

Before I begin explaining this section, I will reiterate what may have been said before:

“A fundamental principle for any educational institution, academic integrity is highly valued and seriously regarded at The University of Texas at Austin. More specifically, you and other students are expected to maintain absolute integrity and a high standard of individual honor in scholastic work undertaken at the University. This is a very basic expectation that is further reinforced by the University's Honor Code. At a minimum, you should complete any assignments, exams, and other scholastic endeavors with the utmost honesty, which requires you to:

- acknowledge the contributions of other sources to your scholastic efforts;
- complete your assignments independently unless expressly authorized to seek or obtain assistance in preparing them;
- follow instructions for assignments and exams, and observe the standards of your academic discipline; and
- avoid engaging in any form of academic dishonesty on behalf of yourself or another student.”*  

*http://deanofstudents.utexas.edu/sjs/acint_student.php

No matter how work is done on these assignments, no matter what, these assignments will be of genuine originality, not copied, ‘borrowed’, or with outside assistance in part or whole of these assignments. No cheating. No stealing. Cite everything you have have taken from an outside source, including ideas and inspiration, especially quotes. The student can use any citation style, but the style should be consistent and recognizable from one of the many academic citation styles available. (I find MLA is the easiest and most flexible, especially around comic and graphic novel sources.)

HOWEVER - I want you as individuals to seek each other out and work together, if possible. The creative engine is sometimes best fueled by working together. I have met and talked with Computer Science majors who only coded with their other CS friends, because coding is easier when working with other coders. Some CS majors I knew never worked with others, but the majority loved working in groups with people they liked. So, I will not assign you to groups, but I have left a nice carrot to entice you guys to come together and try group work with other people in the class you think you like.

NOW - THIS DOES NOT MEAN YOU CAN PRODUCE WORKS TOGETHER - your work will still be your own and yours alone, with no one else will have done work for you. However, you can inspire one another,
and you will mention if someone gave you ideas on how to fix a drawing, restructure a sentence, or a new ending to your comic. You can cite the people you work with as inspiration - as real comic artists and mangaka do, they talk about who helped and guided their vision, even if another person never picked up a pencil and helped them draw. So, please, work with each other, not for each other, and everyone will be better for it.

TURNING THINGS IN:

All assignments are to be posted to Canvas before the due date. DO NOT wait until last minute to turn in an assignment - a technical error on Canvas’ part three minutes before the due date will not be a valid excuse as to why the assignment was turned in late. All students are expected to turn assignments in before due date, and short of a valid and evidence-enforced bit of proof will not extend your due date.

Valid Evidence Includes:
- Doctor’s Note (which any Doctor will give when asked)
- Family Emergency Regalia (which you should send to me at least 48 hours before due date)

I can understand illnesses that do not require going to a medical professional, but this grace for illness without a Doctor’s Note will only be extended once during the semester. Due dates can NOT be extended for weekly assignments. Plan ahead for emergencies as necessary, and stay on top of your work, so when life happens, it does not ruin grades.

DUE DATES:

Every assignment of a Module, including weekly discussions, tweet reviews, and the two major Module assignments, are due by the last day of the Module. These dates are listed in Canvas. The next Module will only be available to view and submit for until the previous Module is over: i.e., once Module One is over, Module Two will open, and Module One will be closed for any assignment submissions. Closed assignments can not receive late submissions, unless otherwise exempt. Weekly Discussions will open during their designated week, then close at the last day of the Module. For example, the first weekly discussion of a Module will be open for four weeks, while the last weekly discussion of a Module will be open for only one week. Stay on top of weekly discussions!

The Final Project and the Final Reflection Essay are different - they are the only assignment not due by the end of a Module. The Final Project and Final Reflection Essay will be due by the designated exam time we have, which will be announced later.

UNIVERSITY SERVICES FOR STUDENTS WITH DISABILITIES:

Any students with disabilities should contact the Services for Student Disabilities to seek any necessary accommodations. If the student already has an exemption or anything he or she needs to talk about, please feel free to email me at my utexas address to talk about needs and what I can do to help.
