INF 380E Perspectives on Information

Course Information:
Unique: 27405
Location: UTA 1.208
Tuesdays, 6 - 9 PM

Instructor Information
Dr. Craig Blaha
email: craig.blaha_at_utexas.edu
office: UTA 5.456
office hours: Thursdays 10 AM – 11:30 AM and by appointment

Course description
A multi-disciplinary and historical examination of information as a primary and foundational concept. Contrasts key literature from information studies with perspectives from other fields.

Course Objectives
• Provide a foundation for understanding the theories, assumptions and perspectives on the nature of information as it appears in a variety of fields.
• Identify the role of information studies, broadly construed, and its role in particular environments and contexts.
• Develop a vocabulary and expertise for thinking critically about the challenges inherent in defining, organizing and accessing information.
• To introduce students to some important “classic” papers, thinkers, concepts, and research fronts in the field
• Participate in discussions regarding current and evolving information forms, tools and technologies, institutions, and policies.
• Envision future directions for information studies and the information professions.

Required Texts
Assignments and Expectations

Participation

Students are expected to attend each class, show up on time and ready to actively engage with the in class discussions and activities, having thoroughly read the assigned materials and thought not only about each reading, but how the readings relate to each other, topics we have previously discussed in class, and how they relate to current events.

It is also important that students work hard to demonstrate respect for the opinions of others, both by listening first to understand, and by carefully and thoughtfully explaining your own ideas.

Discussion Questions

Students will submit to Canvas two discussion questions about the assigned reading by Tuesday morning at 6 AM. Late discussion questions will not be accepted. Discussion questions should be at least one paragraph long and should make it clear that you have both read and thought about the assigned material.

I will prioritize the discussion questions for class based on what I hope you get out of the readings. We will not have time to discuss a submission from each student during each class. Discussion questions are an opportunity for you to bring your own particular point of view and interests to the material we cover in class, and students are encouraged to connect the material to current events.

Group Presentations

Students will make a 30 – 40 minute presentation about either a sub-discipline of information studies (e.g.: usability) or an information related concept (e.g.: metadata). Presentations will be followed by a brief question and answer period. There are twelve different topics, so each presentation group will include a maximum of 3 – 4 students, depending on the enrollment in the course.

This is intended to be a substantial assignment. Students are expected to seek out appropriate literature or experts, become familiar with the overall topic, tease out the perspective on information as it relates to this topic, present the material in an effective way to the class, and answer questions from the instructor and classmates. These presentations have a few goals:

a. For you to familiarize yourself with an area of information studies that you believe will be relevant to your future
b. To educate and inform your colleagues about the selected topic
c. To practice your presentation skills and refine your vocabulary related to that topic
d. To critically examine the perspectives on information common to that topic
Presentation topics will be discussed and assigned/selected on the first day of class. The available topics include:

1. Information Retrieval
2. Archival Studies
3. Information Architecture
4. Information Management
5. Physical Libraries
6. Digital Libraries
7. Knowledge Representation and Reasoning (including Semantic Network)
8. Knowledge Management and Competitive Intelligence
9. Information Behavior (Information Seeking, Everyday Information Behavior, Information Avoidance, etc.)
10. Computer-Supported Cooperative Work and Other Kinds of Information Work
11. Privacy and Security
12. Health Informatics

Students will be given some time during class to touch base with their presentation group and will be asked to write progress reports at various times over the course of the semester.

Each group will create a series of 3 – 5 quiz questions regarding the most important parts of their presentation. I will compile these quiz questions in canvas and we will use them as the final exam on the last day of class.

**Group presentation grading scheme**

Each member of the group will receive an individual grade based on their participation and the overall quality of the presentation. I will determine the grades based on the following criteria:

a. 20% Participation as a member of your group in preparing for the presentation
b. 20% Participation as a member of your group during the presentation
c. 40% Presentation quality
   i. Avoiding the use of “um” and other presentation crutches
   ii. Appropriate use of body movement, clear voice, eye contact
   iii. Content and style of Power Point or other presentation support
   iv. Audience engagement
   v. Assisting other group members with transitions
d. 20% Group presentation questions

**Essay**

Students will submit a five-page essay on a topic of their choice related to the class. This assignment should achieve the following goals:
1. Act as a summative assessment; a culminating project that synthesizes knowledge over the course of the semester. This is your opportunity to formally explore how different perspectives on information relate to your topic.

2. An opportunity to familiarize yourself with the literature in information studies; a substantial component of this essay should be a literature review of published, peer-reviewed journal articles that are relevant to your topic.

3. An opportunity to improve your writing skills.

The essay will be broken up into seven steps. Each of these steps will be discussed in more detail in class. These steps are designed to help improve your writing and to break up the writing process to make it more manageable. Each step will be graded and all of the steps are required. The different steps are:

1. Topic selection
   a. Choose a topic that is relevant to your concentration, personal interests, or future career.
   b. Resources
      i. Compile a list of at least ten resources that are relevant to your topic, formatted using APA.
      ii. At least 5 of these resources should be peer-reviewed journal articles.
   c. Summarize each resource using a short (3 – 4 sentence) paragraph.
   d. Copy any quotations you believe will be useful in your paper, including proper APA in-text citation format.
   e. You may add resources later in the semester, and you do not have to include all of the resources you submit for this assignment in your final essay.

2. Outline
   a. Decide how you will organize your ideas.
   b. Your essay will include an introduction and conclusion paragraph, and your outline should include the key points you plan to discuss in the intro and conclusion (not just “intro to the topic”, for example). A substantial portion of your paper should explore how different perspectives on information relate to your topic.
   c. Include the quotations you plan to use in the proper location in your outline, including your properly formatted in-text APA citation.

3. Draft
   a. Write your first draft by following your outline exactly if possible.
   b. Include a cover page with a clear description of the topic you have chosen to write about.
   c. Include a separate page with your resource list.
   d. Your draft should be at least five pages long, double spaced using Calibri 11 point font and 1 inch margins.

4. Peer Review
a. Dr. Blaha will assign peer reviews to a group of at least three people to work together throughout the semester.

5. Revised Draft
   a. Your revision will have to take into account the feedback from your peer group as well as any improvements you made on your own. Revisions will be graded based on the criteria listed below.

6. Final Draft
   a. If your revised draft grade falls short of your personal goal, you have the option to revise your essay and turn it in for a (possibly) higher grade, replacing the revised draft grade. If you are completely satisfied with your grade, you do not need to submit a final grade and your revised draft grade will count as your final draft grade.

The essay will be evaluated using the traditional letter grade scale listed below (A – F).

Your essay will be graded on the following criteria:

1. Grammar and spelling
2. The clarity of thought demonstrated in your essay
3. Your use of resources (including citation)
4. The structure of the essay and how well you followed writing conventions
5. The overall quality of the essay
6. The depth, quality, and rigor of your exploration of different perspectives on information and how they relate to your topic.

Grading
Each of the components listed above will count toward your final grade as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Final Exam</td>
<td>10%</td>
</tr>
<tr>
<td>Participation</td>
<td>10%</td>
</tr>
<tr>
<td>Discussion Questions</td>
<td>20%</td>
</tr>
<tr>
<td>Group presentation</td>
<td>30%</td>
</tr>
<tr>
<td>Essay</td>
<td>30%</td>
</tr>
</tbody>
</table>

Grading Scale
The standard grading scale will be used to evaluate student work:

- A  94-100
- A- 90-93
- B+ 87-89
- B  83-86
- B- 80-82
- C+ 77-79
- C  73-76
- C- 70-72
- D+ 67-69
- D  63-66

Final Essay Due

Resources

Style Manuals
Students will need to cite all sources for their essays in APA format. Purdue University Online Writing Lab (OWL) offers a great overview on how to do this. [http://owl.english.purdue.edu/owl](http://owl.english.purdue.edu/owl) Style manuals are located under Research and Citation.

University Policies

Academic Integrity
Please abide by the University’s policy on academic integrity. All work you submit must be your own. "Scholastic dishonesty includes, but is not limited to, cheating and plagiarism... Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including the possibility of failure in the course and/or dismissal from the University. University policies on scholastic dishonesty will be strictly enforced." From: The University of Texas: General Information, Appendix C.

Special Needs
The University of Texas at Austin provides upon request appropriate academic accommodations for qualified students with disabilities. To determine if you qualify, please contact the Dean of Students at 471-6259; 471-4641 TTY. If they certify your needs, we will work with you to make appropriate arrangements.

Religious or Holy Day Observance
"A student who misses classes or other required activities, including examinations, for the observance of a religious holy day should inform the instructor as far in advance of the absence as possible, so that arrangements can be made to complete an assignment within a reasonable time after the absence.” ([http://www.utexas.edu/student/registrar/catalogs/gi04-05/ch4/ch4g.html](http://www.utexas.edu/student/registrar/catalogs/gi04-05/ch4/ch4g.html))

Email
“Electronic mail (e-mail), like postal mail, is a mechanism for official University communication to students. The University will exercise the right to send e-mail communications to all students, and the University will expect that e-mail communications will be received and read in a timely manner.” ([http://www.utexas.edu/student/registrar/catalogs/gi04-05/app/appn.html](http://www.utexas.edu/student/registrar/catalogs/gi04-05/app/appn.html)). I will reply to student emails within 24 hours on weekdays and 48 hours on weekends barring a rare and extenuating circumstance.
I look forward to working with you all this semester. If you have any questions, comments, or concerns, do not hesitate to email me!
