Class Meetings: Wednesdays 3-6pm in UTA 1.210A
Instructor: Danna (pronounced similar to “Donna”) Gurari (rhymes with Ferrari)
Pronouns: she/her/hers
Email: danna.gurari@ischool.utexas.edu
Office Location: UTA 5.442
Appointments: If you wish to make an appointment, the best way to do this is by email. Please note that I typically need at least 24 hours notice. If you prefer to email me a question, please note that I typically respond to emails on weekday mornings.
Food: No food or chewing gum is allowed in class.

Course Overview

Summary
This class will cover fundamental and state-of-art problems in computer vision, the sub-discipline of artificial intelligence that tries to create computers that can “see”. Students will explore this field through examination of the human-based challenges faced when teaching computers to see. Classes will be a mix of lectures and hands-on training to develop practical skills in web development and crowdsourcing.

Objectives
By the end of the course, the goals are for students to:

1. Recognize core and cutting edge computer vision concepts, a critical precursor to effective collaborations in industry or academia. Towards this aim, students will:
   - Critique research papers that establish the datasets which define and promote computer vision problems for investigation by the research community at large

2. Design crowdsourcing systems that can be harnessed to efficiently create high quality “big” datasets. Towards this aim, students will:
   - Evaluate crowdsourcing systems discussed in computer vision research papers
   - Employ Amazon Mechanical Turk (AMT) workers via an application programming interface (api)
   - Utilize command line tools

3. Create interactive web pages for generating computer vision datasets. Towards this aim, students will:
   - Architect web tools using HTML and CSS
• Develop programming skills by writing code in Javascript

4. Understand the key ideas in machine learning. Towards this aim, students will:
• Characterize the process to train and test machine learning algorithms
• Understand how machine learning algorithms become biased

5. Conduct and communicate original research. Towards this aim, students will:
• Propose a novel research idea (this will be an iterative process)
• Design and execute experiments to support the proposed idea
• Write a research paper about the project (and possibly submit it for publication)
• Present the project to the class

Prerequisites
While there are no requirements, a background in programming will be helpful.

Website
https://www.ischool.utexas.edu/~dannag/Courses/CrowdsourcingForCV/

Class Participation
Students are expected to attend every class. Every student should demonstrate ongoing engagement in class discussions and complete the material discussed in every lab session.

Reading Assignments
Students will have five weekly assigned readings with associated questions to answer about the material. Each assignment description will be posted on the course website before the due date. These assignments will offer training in thinking critically about existing computer vision research and brainstorming novel research ideas to fill existing gaps/problems. Each assignment must be submitted in Canvas by 11:59pm on its due date.

Lab Assignments
Two lab assignments will be assigned for the first half of the course. Each assignment description will be posted on the course website before the due date. These lab assignments will develop students’ skills to build systems similar to those described in the weekly readings. Each assignment must be submitted in Canvas by 11:59pm on its due date.

Final Project
Assignments related to the final project will be due during the second half of the course. Details about each assignment will be posted on the course website prior to its deadline. The goal for the final project is to further develop students’ skills in conducting and communicating original research.

Grading

Final course scores will be calculated as follows:

<table>
<thead>
<tr>
<th></th>
<th>% of Final Class Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class Participation</td>
<td>5%</td>
</tr>
<tr>
<td>Reading Assignments</td>
<td>25%</td>
</tr>
<tr>
<td>Lab Assignments</td>
<td>30%</td>
</tr>
<tr>
<td>Final Project</td>
<td>40%</td>
</tr>
</tbody>
</table>

Final course scores represent the following grades (scores are rounded to the nearest integer):

<table>
<thead>
<tr>
<th>Grade</th>
<th>% of Final Class Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>94-100%</td>
</tr>
<tr>
<td>A-</td>
<td>90-93%</td>
</tr>
<tr>
<td>B+</td>
<td>87-89%</td>
</tr>
<tr>
<td>B</td>
<td>84-86%</td>
</tr>
<tr>
<td>B-</td>
<td>80-83%</td>
</tr>
<tr>
<td>C+</td>
<td>77-79%</td>
</tr>
<tr>
<td>C</td>
<td>74-76%</td>
</tr>
</tbody>
</table>

For detailed information about what grade is required for you to receive credit for this class, please refer to [UT’s Graduate Catalog](#). For example, students in the School of Information (iSchool) are required to receive a grade of B or higher in order to include this course in their [program of work toward graduation](#). In addition, the UT Graduate School requires a minimum grade of C or higher to count a course for credit.

Late Policy

Late submissions will be penalized 1% of the grade per hour up to 8 hours. After 8 hours, no credit will be given.

Resources

There are no required textbooks. We will draw heavily from research papers and online tutorials. Links to these resources will be posted on the course website for each class meeting.

Policies

**Academic Honor Code**

Each student in the course is expected to abide by the University of Texas Honor Code: “As a student of The University of Texas at Austin, I shall abide by the core values of the University and uphold academic integrity.” Plagiarism is taken very seriously. Therefore, if you use words or ideas that are not your own (or that you have used in a previous class), cite
your sources. Students who violate University rules on academic dishonesty are subject to severe disciplinary penalties, such as automatically failing the course and potentially being dismissed from the University. Please do not take the risk. Every student is responsible for understanding the Academic Honesty and the University Honor Code which can be found at the following web address: [http://deanofstudents.utexas.edu/sjs/acint_student.php](http://deanofstudents.utexas.edu/sjs/acint_student.php)

Please note that all assignments in this course may be processed by TurnItIn, a tool that compares submitted material to an archived database of published work to check for potential plagiarism. Other methods may also be used to determine if a paper is the student’s original work. These tools will assist in deciding if an assignment has been plagiarized.

**Excused Absences**
A student will be given an opportunity to complete any work missed due to absences in observance of a religious holy day or military service. For a holy day, the student must notify me at least two weeks in advance of the absence. Please see the following link for more details: [http://catalog.utexas.edu/general-information/academic-policies-and-procedures/attendance/](http://catalog.utexas.edu/general-information/academic-policies-and-procedures/attendance/) The student will not be penalized for excused absences, but must complete the missed material within a reasonable time after the excused absence.

**Q Drop Policy**
If you want to drop a class after the 12th class day, you’ll need to execute a Q drop before the Q-drop deadline, which typically occurs near the middle of the semester. Under Texas law, you are only allowed six Q drops while you are in college at any public Texas institution. For more information, see: [http://www.utexas.edu/ugs/csacc/academic/adddrop/qdrop](http://www.utexas.edu/ugs/csacc/academic/adddrop/qdrop)

**University Resources for Students**
Your success in this class is important to me. We will all need accommodations because we all learn differently. If there are aspects of this course that prevent you from learning or exclude you, please let me know as soon as possible. Together we’ll develop strategies to meet both your needs and the requirements of the course. There are also a range of resources on campus:

- **Coping with Stress and Personal Hardships**
  All of us benefit from support during times of struggle. You are not alone. There are many helpful resources available on campus and an important part of the college experience is learning how to ask for help. Asking for support sooner rather than later is often helpful. If you or anyone you know experiences any academic stress, difficult life events, or feelings like anxiety or depression, please consider taking advantage of the support available to you. [http://www.cmhc.utexas.edu/individualcounseling.html](http://www.cmhc.utexas.edu/individualcounseling.html)

- **Accommodations for Disability**
  Students of all backgrounds, identities, and abilities are welcome in this class. If there are circumstances that make the learning environment and activities difficult, if you have medical information that you need to share with me, or if you need specific arrangements in case the building needs to be evacuated, please let me know. I am committed to creating an effective learning environment for all students, but I can only
do so if you discuss your needs with me as early as possible. I promise to maintain
the confidentiality of these discussions. If appropriate, also contact the Services for
Students with Disabilities: 512-471-6259 (voice) or 1-866-329-3986 (video phone).

- The Sanger Learning Center
  All students are welcome to take advantage of Sanger Center’s classes and workshops,
  private learning specialist appointments, peer academic coaching, and tutoring for more
  than 70 courses in 15 different subject areas. For more information, please visit
  http://www.utexas.edu/ugs/slc or call 512-471-3614 (JES A332).

- Writing Center
  All students are encouraged to consult the University Writing Center (UWC):

Important Safety Information
If you have concerns about the safety or behavior of fellow students, TAs, or Professors, call
BCAL (the Behavior Concerns Advice Line): 512-232-5050. Your call can be anonymous.
If something doesn’t feel right—it probably isn’t. Trust your instincts and share your concerns.

Title IX Reporting
Title IX is a federal law that protects against sex and gender-based discrimination, sexual
harassment, sexual assault, sexual misconduct, dating/domestic violence, and stalking at
federally funded educational institutions. UT-Austin is committed to fostering a learning
and working environment free from discrimination in all its forms. When sexual misconduct
occurs in our community, the university can:

1. Intervene to prevent harmful behavior from continuing or escalating.

2. Provide support and remedies to students and employees who have experienced harm
   or have become involved in a Title IX investigation.

3. Investigate and discipline violations of the university’s relevant policies.

Faculty members and certain staff members are considered “Responsible Employees” or
“Mandatory Reporters,” which means that they are required to report violations of Ti-
et IX to the Title IX Coordinator that are disclosed in writing, discussion, or one-on-
one. Before talking with any faculty or staff member about a Title IX related incident, be
sure to ask whether they are a responsible employee. If you want to speak with someone
for support or remedies without making an official report to the university, email advo-
cate@austin.utexas.edu. For more information about reporting options and resources, visit
https://titleix.utexas.edu or contact the Title IX Office at titleix@austin.utexas.edu.
